Preparing for Summer Stress
Gordon Kauffman III, Ph.D., Grigg Brothers

In this TurfNet University Webinar, Gordon Kauffman III, Ph.D., technical representative for Grigg Brothers, will address how to prepare for the inevitable summer stress season and its impact on cool-season turf on intensely managed sites. He also will provide insight on how to implement the correct cultural practices; an overview of biotic and abiotic stress; definitions; pesticide programs; research; and the correct uses of phosphites and elicitors and how to put it all together to build comprehensive programs.

Bermudagrass and Seashore Paspalum Ecology and Management
Tim Hiers, CGCS, The Old Collier Golf Club

Tim Hiers, CGCS at The Old Collier Golf Club in Naples, Fla., will discuss turf management topics specific to various types of Bermudagrass and Seashore Paspalum. His presentation will introduce the attributes, including the benefits and limitations of these warm-season grasses, grow-in techniques, water-related issues, disease matters, soil-testing needs, best-management practices and other concerns specific to warm-season grasses.

Program Building

Gary Grigg, CGCS, Grigg Brothers

In this TurfNet University Webinar, Gary Grigg, CGCS, vice president of Grigg Brothers will discuss the importance of developing and selling a program-based budget. His presentation will include tips on how to write a maintenance standards policy and a subsequent program-based budget that includes a written maintenance plan, organizational chart of your department, description of each category item in your budget, capital equipment needs and improvement projects.
